Subject: RE: Review of 3282-100 to 103, Question

Hi Heather –

See attached for what the label would look like on the sleeve. Except we will not have the claim “this bait station can only be refilled with the bait blocks sold with this station” because it is only a sleeve with the refill blocks and not the bait station.

I cannot get my hands on a picture but the best description I can give you is picture opening a cereal bag (not the box but the bag). The sleeve is the bag containing the blocks and it is sealed on the top and bottom like a cereal bag.

Let me know if this helps.

FYI - our competitor Tomcat has the refillable bait station in a re-sealable bag with loose blocks. So our sleeves containing only 3 – 6 blocks is a much better design.

Christine

Dear Ms. Bjornson,

I am reviewing your amendments for these 4 products.
What are "Refillable Sleeves" referred to on these refillable products,
3282-102 and 3282-103?
Please define and send me an image with the text.

Thank You,

Daniel B. Peacock, Biologist
